

# *Enclosure Space Heaters*

## Applications

HEATREX Enclosure Space Heaters are designed to maintain temperature and minimize moisture inside electrical and mechanical equipment enclosures. They conveniently replace strip heaters or other less efficient heating devices.

## Standard Features

- Alloy sheathed tubular element
- Grade "A" magnesium-oxide
- Highest quality nickel chromium resistance wire
- Perforated plated steel shroud
- Multitude of 3/8" diameter mounting holes
- U.L. recognized component

## Optional Features

- Custom wattages/voltages
- Custom dimensions/sizes
- Special moisture resistant vulcanized terminal with lead wire
- Custom mounting brackets and shrouds

## Benefits

- Long life element
- Easy installation
- Less expensive than strip heaters
- Corrosion resistant mounting bracket offers maximum protection from accidental contact of heating element while allowing continuous circulation of air

## Installation

Enclosure space heaters can be mounted to equipment cabinets utilizing the perforated holes. Terminals have #8-32 screw tabs for convenient electrical connections.
